Our ERASMUS work...

Accreditation in the field of Vocational Education and Training KA120

2022 – KA121 – Project ongoing

2023 – KA121 – Project ongoing

2021 – KA220 – DigiCAMP - Project ongoing

2020 – KA229 – GENERATION 4c – Just finished

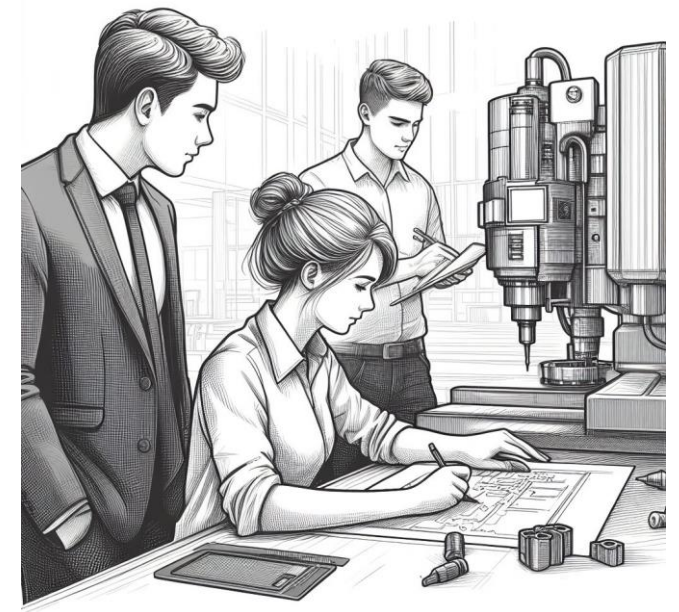

Our ERASMUS results...

During the school year 2022 – 23

Short-term mobility	–	55 students
Long-term mobility	–	2 students
Teacher shadowing	–	4 teachers
Teacher Training	–	3 teachers
Planning meeting	-	many, not official

Thank you!

All participants then had to inform others about their activities within the ERASMUS+ project

What can we offer...

We can organize a work placement for your students in our workshops or in cooperating companies.

Machining (CNC), Civil construction, Woodworking.

KOVOSVIT MAS machines for your future

What can we offer...

We can offer shadowing for your teachers at our school

What can we offer...

During the activities, we provide to students or teachers the accommodation in our dormitory. They can also use and eat in our dining room (except weekend).

We try to connect them with our students as well.

What can we offer...

CNC and measurment MODUL of VET

22.4. – 3.5. 2024

Approx. 10 participants from abroad

The module is based on a CNC milling center with a Heidenhain control system. That's what we learn to operate, adjust and program. It is also focused on common engineering measuring methods.

What can we offer...

Electro MODUL of VET

20.5. – 31.5. 2024

Approx. 10 participants from abroad

Anotation: In the module "Analog and Digital Electronics", we will go through the entire process of designing and constructing an analog circuit. We revive the connection on a non-soldering contact field and design a circuit board. Subsequently, we make a printed circuit board, power the components and revive the entire connection. In the course, we will also get to know different methods of soldering classic or SMD components. In the second week, we will try to assemble and program a project using Arduino.

What can looking for...

Cooperation in new KA2 projects

I reported to our national agency. Applications will be submitted in the spring of 2024 and a meeting for interested parties is planned in January 2024.

What is our wish...

To maintain and develop international cooperation and offer our pupils interesting opportunities in the ERASMUS programme

**Thank you for your
attention**
